## CANDOCK COPORATE PROFILE

### OUR MISSION

Develop, produce and commercialize docks and modular floating systems that are adapted to the needs of our international clientele. Always put the development of our partners at the forefront while taking into account the qualities and skills of the latter as well as their goals and ambitions.

### OUR HISTORY

20 years of continuous growth and success. Our company is now known as a world leader in engineering, manufacturing, distributing and installing modular floating systems. And it's only the beginning!

### OUR EXPERTISE

For over 20 years, our team has developed an expertise in producing the highest quality plastics. Today, our customers can benefit from our ability to manufacture a wide range of products in our recently expanded plant equipped with modern and high-performance equipment, is also CERTIFIED ISO 9001:2008, 14001:2004.

### OUR PRODUCTS

We are continuing our research and development to offer you the highest quality products on the market today. Our sophisticated technology, combined with our expert customer service, has made Candock a leader on the international market. Our systems are ready to use on delivery for any large-scale projects.

### OUR WARRANTY

Our distribution network now includes all five continents. We have exactly what you need and we can deliver it - no matter where you live. With Candock's 20-year warranty, you will walk on water carefree!

## WHO ARE WE?

Candock is a team of entrepreneurs who strive for greater challenges on an everyday basis. Three gentlemen, based in the French part of Canada, fueled by new encounters, new possibilities and new ideas.

Taking over a 20 years old family business is not a thing to be taken lightly and we are not planning on sitting on it!

## CANDOCK PRODUCTS

### **AN UNLIMITED NUMBER OF CONFIGURATIONS**

These revolutionary cubes can adapt to any shoreline, and you can assemble them to create whatever shape and size you like. The configuration options are limitless.....Just use your imagination!

### **LIGHTWEIGHT, STURDY AND SAFE**

The safety aspect of nautical products is critical. This is why the Candock system has undergone rigorous testing. Its safety features include excellent dock stability, high load capacity, an anti-skid surface and no metal parts.

### **POLLUTION AND UV RESISTANT**

Made of high density polyethylene resin, Candock floating cubes are remarkably resistant to impact, climate change, the adverse effects of water and the sun and a wide range of chemical products.

### **MAINTENANCE-FREE**

(100% PLASTIC) With the Candock system, the concept "maintenance-free" means ZERO maintenance - no more, no less. No more lost time, no more expense, and no more work to be done on a conventional wooden or metal dock year after year.

### **EASY AND QUICK TO ASSEMBLE**

The Candock system is simple: blocks closely and firmly held together by special mounting screws. All pieces are light and easy to handle.

### **ENVIRONMENTALLY FRIENDLY**

The modular structure components do not oxidize or deteriorate. This means that the floating dock will stay in its natural state.

### **OPTIMIZED FOR EXPORTATION**

All the products we develop are designed so that their exportation is optimized. Each cubic meter available to transport the product is profitable. We can export 30% more product in one shipment than our nearest competitor which means you pay less for our product regardless of where you are on this blue planet.

### **CONSTANTLY LOOKING FOR NEW CHALLENGES**

For the past 20 years, we've been coming up with new ideas, new concepts and new products. We're proud to be the main game changer in the modular floating dock industry and be sure that it's just the beginning. Wait till next year!

### **A COMPLETE ACCESSORY LINE**

Ranging from LED light systems to comfortable "marine grade" furniture collections, our accessory line is loaded with everything you need to fully squeeze every penny out your investment. If you don't find what you're looking for, we will get to our drafting table and we will create, develop, manufacture and market it for you.

### **A MULTI-PURPOSE SOLUTION TO YOUR PROBLEM**

Being modular, our cubes can be reconfigured in practically any shape or form you can imagine. We know you know it, but, what this means for YOU is a completely different story. Modular also means that your "regular" dock can also be transformed in a useful work platform, later, a "boating dock", the year after, a drive on system for your new "JETSKI" that you want to protect from the humidity and aquatic organism such as barnacles. 10 years later, it also means that when you'll sell the cottage you've owned for these past 10 years, you'll be able to recapitalize on your initial investment because our products are built to last, not to trash.

## CANDOCK MARKETS

### RESIDENTIAL AND COMMERCIAL DOCKING

The modular aspect of our products makes them perfectly adapted to the residential and commercial market. Easy to manipulate, anchor, install and maintain (100% maintenance free), our cubes have also been designed to be exported around the world intelligently by maximising container space. The result: the simplest, most durable product available on the market and the market, supported by the most efficient supply chain there is.

### THE "JETSLIDE" DRY DOCKING SYSTEMS ( FOR BOATS AND PERSONNAL WATER CRAFTS )

Keep it simple is the key here. No moving parts, a durable yet modular structure, a foamed fill interior, these features translate in a "user-friendly" efficient product. The JETSLIDE has been especially designed to evenly distribute the watercraft's weight, thus preventing any excessive pressure on the hull. The JETSLIDE is a unique patented dry dock system that protects the hull of your watercraft from the accumulation of shellfish and marine vegetation. The JETSLIDE also enables you to walk safely around your pleasure craft. No more metal structures obstructing your view

### MARINAS

The same rules as the dry docking systems apply here, "keep it simple" and "know your strengths. Candock's marina solutions are the most cost efficient and practical solutions in the modular marinas market. Beneficiating of an in-house engineer service and our own machine shop facility, we can provide customized solutions according to your needs. Candock also offers the best and safest service channel system of the industry and also gives you the ability to light the surface of the dock itself. In addition to our regular product line, we developed a "hybrid" marina finger to get the best of both worlds, between aluminum and modular.

### LEISURE

This market is huge and we have solutions for every application: Personal watercraft renting facilities, Floating pools for high end hotels, docks for rowing clubs or a simple swimming platform. We have the quality and prices to meet the requirements of any project.

### INDUSTRIAL AND MILITARY

For the past 20 years, we've been putting our products to the test in various situations. Through time, many notable companies and military organizations necessitated our products for various applications. We came to know what is needed to fulfill the high level requirements of that market and we acted accordingly. The solution is to offer the most efficient product and customized service available on the market. For these clients, quality at every level is paramount and that is what we offer.

### SPECIAL PROJECTS

The success of Candock in this demanding market has always been its ability to offer turnkey solutions to its clients. The fact that we can take a project from planning phase to conclusion reassures our clients and guarantees them that everything will integrate perfectly and have peace of mind by doing business with only one supplier. Partnering up with the world leaders in special event planning and production, we developed an unprecedented expertise in the field of special events. Dubai, South Africa, China, Japan, United States, Canada and many other countries have required our services through time. From F1 Grand Prix, to firework platforms, to live exterior music festivals, we are there to provide global turnkey solutions to any "punctual" needs our clients could have.

## TURN KEY PROJECTS

Candock inc. is the only company producing modular floating systems that can offer you a turnkey service for all your projects. Candock can manufacture any accessories or equipment according to your requirements and specifications. Our turnkey solution means you deal with only one supplier and you save time, money and efforts. You won't run the risk that our products are incompatible with other equipment.

Furthermore, Candock has qualified personnel who will supervise your project from start to finish. We also have extensive expertise in international large size projects. The quality of our installations, products and service is recognized worldwide.

Candock can help you develop your project from the initial idea right down to the last details. We can assist you with project plans, engineering, transport, installation, etc. This is basically a complete project put together in a short time frame.
